

SWARNAMAYEE CHARITABLE TRUST

Annual Activities Report 2025–26

Website Publication Version

This report is a professionally structured website version of the supplied six-page activity document. The programme descriptions and achievement figures below are based on the source document.

2025–26 Highlights

Area	Reported Achievement
Mainstream Education	100 children helped to continue/mainstream in government schools.
Free Tuition	70 students helped to receive free tuition.
Food Support	Food packets distributed to destitute people across Jajpur, with donations from supporters.
Stray Animal Support	Food distributed to stray animals and shelter arranged for stray animals.
Tree Plantation	Plantation drives organised in different states, with more than 3,500 plantations reported.
Healthcare	600 BPL people helped through free health check-ups via health camps.

Note: These figures are reproduced from the supplied 2025–26 source document and have not been independently verified.

1. Child Home Program

The Child Home Program is described as an initiative for the well-being and development of vulnerable children, including orphaned, abandoned and disadvantaged children. The programme aims to provide a safe and nurturing environment, with nutritious meals, healthcare, education and emotional support. It also focuses on confidence-building, life skills and opportunities for children to pursue their dreams. The source document states that 40 children had been supported at the start of the anticipated programme and expresses an intention to expand the programme in the following year.

2. Women Empowerment Program

The Women Empowerment Program is presented as a community initiative focused on improving women's self-reliance and economic independence. Activities include skill-development workshops, business-plan creation, life-skills training, income-generating activities, small-scale entrepreneurship and vocational skills. The programme also describes mentorship, guidance, access to resources, confidence building and leadership development.

3. Business Plan Development for SHGs

The trust describes a Business Plan Development programme for Self-Help Groups (SHGs). It provides guidance on market research, financial planning and strategic development, together with hands-on workshops, one-to-one mentoring and access to resources. The stated objective is to help SHGs identify opportunities, set goals, manage enterprises and build long-term economic stability and self-sufficiency.

4. Life Skill Education Training

The Life Skill Education Training programme focuses on essential competencies for SHG members, including financial literacy, effective communication, problem-solving and decision-making. Through practical workshops and interactive sessions, the programme aims to strengthen confidence, self-reliance and the ability of participants to manage personal and professional challenges.

5. Scale Poultry Farming

The Scale Poultry Farming initiative is described as a livelihood and agricultural programme. It provides training and resources for efficient poultry farming, including workshops on poultry management, biosecurity and disease prevention. The programme also focuses on improved breeds, productivity and profitability for local farmers.

6. Livelihood Support Program

The Livelihood Support Program focuses on sustainable economic opportunities for underserved communities. The source document describes targeted training and resources, crop diversification and intensification, and practical training in climate-resilient farming, organic manure and bio-pesticide preparation.

7. Demonstration of Climate-Resilient Crops for Food Security

This programme demonstrates agricultural practices designed to adapt to changing climate conditions. It promotes drought-resistant and pest-tolerant crop varieties to help farmers protect yields against unpredictable weather patterns and strengthen food security.

8. Training on Organic Manure & Bio-Pesticide Preparation

The programme provides farmers with practical training in preparing organic manure and bio-pesticides. It promotes eco-friendly fertilisers and natural pest-control solutions with the stated aims of reducing chemical dependency, improving soil fertility and supporting sustainable crop production.

9. Miscellaneous Programs

The trust describes a range of community-welfare activities, including health camps, distribution of essential supplies, educational workshops, support for underprivileged families, emergency relief and environmental activities. The stated objective is to address immediate needs while creating longer-term positive community impact.

10. Blood Donation Camp

The Blood Donation Camp initiative is described as a regular life-saving activity intended to support patients requiring blood for emergencies, surgeries and chronic conditions. The trust states that it works with local hospitals and blood banks and provides a safe and supportive environment for donors. The source document reports 150 people as beneficiaries of the camp.

11. Healthcare Support & Campaign

The trust describes regular health check-up camps in villages, awareness about government healthcare schemes and support through community health-care units. The report also mentions free ambulance support for critical patients when 108 services are delayed, as well as participation by volunteer doctors. It states that the organisation served more than 500 people during the year.

12. Environment Awareness

The Environment Awareness programme focuses on tree planting, environmental education and awareness of pollution and alternative energy sources. The trust reports distributing saplings to rural areas and conducting awareness programmes for women and adolescent youth. It also describes activities associated with Earth Day and Van Mahotsav, including planting trees and distributing plants across 4–5 villages.

Website Publication Note

This document is a structured presentation of the supplied six-page 2025–26 activity report. No new programme claims have been added. Where the source document provides broad descriptions rather than measurable outcomes, the wording remains descriptive.

Recommended Supporting Information for the Website
